## EUSALP Workshop

### Connectivity in the Alpine Region: Focus on Intermodality of Transport Systems and Maritime Dimension

In the framework of the Italian Presidency of the EU Strategy for the Alpine Region-EUSALP 2019, the Friuli Venezia Giulia Autonomous Region is promoting the workshop “Connectivity in the Alpine Region: Focus on Intermodality of Transport Systems and Maritime Dimension”. This event is intended as an opportunity for discussion and dialogue among the institutional representatives and key stakeholders in the transport sector coming from the EUSALP Countries and Regions. The goal is to enable a detailed examination of the relevant issues affecting the sustainable development of transport and mobility systems at macroregional level. In line with the EUSALP Action Group 4 “To promote inter-modality and interoperability

in passenger and freight transport” activity, particular attention and focus will be placed on the following topics: the maritime dimension and links between the port network and the intermodal transport system of the Alpine Region; innovative solutions for integrated transport systems and ICT applications; new forms of cooperation; “missing links”; accessibility in remote areas; measures towards a more efficient and integrated policy and financial instruments to reinforce cross-border and transnational cooperation.

The invitation to the workshop will be issued shortly, along with the programme for the working day.
